Table 3.

Overview

The Pentagon Reservation Maintenance Revolving Fund (PRMRF), established under Section 2674 of Title 10, United States Code (10 U.S.C. §2674), finances the maintenance, sustainment, protection, repair, and renovation of the Pentagon Reservation. The “Pentagon Reservation” refers to the 240 acres of land located in Northern Virginia and Maryland, on which stands the Pentagon Building and the Pentagon Heating and Refrigeration Plant, the Mark Center (MC) Campus, the Raven Rock Mountain Complex (RRMC), and other related facilities including parking areas. The Pentagon Reservation requires 24/7/365 readiness to enable the Department of War (DoW) and National Leadership to execute their mission responsibilities as well as to provide safe, secure, healthy, resilient, energy efficient and operationally effective working environments for the DoW workforce. The PRMRF is managed by the Washington Headquarters Services (WHS) and finances select activities of the WHS and the Pentagon Force Protection Agency (PFPA) within the Pentagon Reservation.

The PRMRF provides space, building services, relocation capabilities, and force protection for DoW Components, including Military Departments and other activities within on the Pentagon Reservation. The WHS collects revenue from the tenants of the Pentagon Reservation for occupied office space to provide for standard building and security services. The DoW tenants who request above standard services pay an additional amount for those services. The PRMRF improves DoW oversight of Pentagon Reservation buildings and enables the DoW to manage the Pentagon Reservation effectively and efficiently without the need for third party commercial real estate vendors.

Activity Group Composition

Real Property Operations:

Facility upkeep within the Pentagon Reservation is necessary at levels adequate to support the assigned mission and to prevent deterioration and damage to facilities, systems, and operating equipment, and to maintain a world-class headquarters for the Department of War. In pursuit of this requirement, the WHS Facilities Services Directorate (FSD), through the PRMRF, provides: facility management services to include space allocation; maintenance, custodial services, repair, alterations, operations and repair of mechanical and utility systems; landscaping, roads, and grounds maintenance; design and construction; property and real-estate management; permits and compliance with fire, occupational health and safety, environmental sustainability, and energy resiliency at national standards.

The PRMRF provides for the operation and utilization of the Pentagon Heating and Refrigeration Plant as well as, the classified waste incinerator.

The RRMC is the facility for the DoW Continuity of Operations Plan (COOP) for the Office of the Secretary of War, the Joint Staff, and Senior DoW Leadership. The RRMC supports COOP operational readiness by providing a safe and secure environment for DoW essential functions.

WASHINGTON HEADQUARTERS SERVICES
Pentagon Reservation Maintenance Revolving Fund
Fiscal Year (FY) 2027 Budget Estimates
April 2026

The PRMRF further funds financial management, acquisition, and human resource services for the Office of the SecWar and the PFPA.

Pentagon Force Protection Agency (PFPA):

The PFPA is responsible for providing law enforcement, force protection, security, counterintelligence, antiterrorism, mission assurance, and chemical, biological, radiological, and nuclear protection to the people, facilities, infrastructure, and other resources at the Pentagon Reservation. The PFPA provides these services to DoW activities within the National Capital Region (NCR) and to the RRMFC. The PFPA is the lead agency for coordination with DoW components, executive departments, agencies, and state and local authorities involving force protection, security, and law enforcement for the Pentagon Reservation and DoW facilities within the NCR.

The following table summarizes PRMRF actual and estimated obligations by activity group.

Budget Sub-Activity	Dollars in Millions							
	FY 2025		FY 2026			FY 2027		
	Operating	Capital	Operating	Capital	% Change	Operating	Capital	% Change
Real Property Operations	493.1	59.9	444.9	50.7	-11.6%	451.3	47.0	0.6%
Pentagon Force Protection Agency	304.8	7.0	289.5	6.2	-5.4%	291.3	5.9	0.5%
Total by Category	797.9	66.9	734.4	56.9	-9.3%	742.6	53.0	0.5%
Total PRMRF	864.8		791.3		-8.5%	795.6		0.5%

Table 4.

Tenant rates are set to recover both operating and capital investment costs budgeted for each year. The FY 2027 request reflects an increase to the standard rates of 2.0% from FY 2026 rates, and an increase in total operating capacity of 0.5%.

Operating Budget

The operating budget includes annual inflationary adjustments for supplies, equipment, service contracts, and personnel. It also provides for a safe and secure environment including effective, proactive force protection and anti-terrorism programs for Pentagon Reservation personnel, assets and facilities.

In FY 2027 standard rates remain steady with the only significant increase allocated to the ARDENT HALO program's security infrastructure, plus nominal adjustments for inflation. These rates are possible due to major efficiency initiatives from FY 2026, which reduced operating requirements by eliminating the Pentagon library, cutting shuttle bus hours, canceling subscriptions, reducing service contracts, rephasing maintenance, and descoping security missions.

The FY 2027 RPO budget includes a one-time \$554 million increase from above-standard orders to fund deferred maintenance at the Pentagon (\$513 million) and

WASHINGTON HEADQUARTERS SERVICES
Pentagon Reservation Maintenance Revolving Fund
Fiscal Year (FY) 2027 Budget Estimates
April 2026

security upgrades at RRMF (\$41 million). These funds were submitted in the WHS FY 2027 Operation and Maintenance budget (O&M)-with the Pentagon portion as Reconciliation funding—and will be received in the PRMRF as an above-standard order from WHS.

Capital Budget

The capital budget includes security improvements and Facilities Related Control Systems (FRCS) upgrades at the Pentagon, FRCS upgrades at the Mark Center, Facility Sustainment Restoration and Modernization projects to include fire prevention and emergency response capabilities, and new fire-fighting apparatus at the RRMF. The capital budget also includes security infrastructure modernization and access control upgrades to meet Homeland Security Presidential Directive 12 (HSPD-12) requirements for the PFFA security operations.

Rates for capital projects are being held steady with inflation after efficiency initiatives were undertaken in FY 2026. These initiatives include, but are not limited to, project rephasing for infrastructure upgrades at the Pentagon and Mark Center and deferment of PFFA equipment purchases.

PRMRF-Wide Consolidated Services

The below chart illustrates an overview of some of the standard services provided by the PRMRF to building tenants within the Pentagon Reservation compared to those provided by commercial building vendors.

Service	Commercial(Typical)	Commercial(Full-Service)	PRMRF
Work & Common Space Service	✓	✓	✓
Tax & Insurance	✓	✓	n/a
Utilities (Water, Electric, Gas, etc.)	✗	✓	✓

Table 5.

Initiatives

The WHS and the PFPA continually pursue opportunities to improve business practices and efficiencies, minimize costs to customers, and streamline services. Examples of recent initiatives include:

- Reevaluating contract support requirements and the use of insourcing when cost effective
- Reducing personnel costs through workforce reshaping
- Identifying and reducing services that are redundant or no longer cost effective
- Decreasing bureaucratic processes by including the cost of overtime heating, ventilation, and air conditioning (HVAC) in the standard Pentagon rent.

Ongoing Programs

In recent years, WHS has taken over services for Pentagon tenants that were formerly managed by the Military Departments. These transitions were executed through signed Memoranda of Agreement for personnel transfers. The funding for these operations, originally from the Military Departments, is now billed directly to tenants as part of their annual Pentagon Rent. This includes:

- Operation of the Pentagon Library, which has now been realigned to the Executive Services Directorate within WHS
- Operation of the Pentagon Post Office and consolidation of all Pentagon mail rooms
- Operation of the Pentagon Athletic Centers
- Operation of the Pentagon Motor Pool program
- Financial responsibility for safety requirements for operation of the Pentagon Helipad
- Pending: Operation of the Pentagon Auditorium

The WHS continuously conducts architectural and engineering studies to address infrastructure deterioration at the Pentagon and Mark Center, which result from normal aging and use. To maintain the integrity of these properties, periodic funding infusions are necessary for capital repairs in a manner consistent with the Pentagon Reservation Master Plan. The WHS FSD oversees master planning and execution for the Pentagon Reservation to ensure readiness, improve security, safety, and quality of life for employees and visitors, and enhance sustainability and energy resiliency.

Cash Management

The fund operates by balancing cash disbursements with rent collections from building tenants. For FY 2027, WHS forecasts a significant increase in both collections and disbursements for RPO and PFPA operations compared to FY 2026. As shown in Chart 1, this surge is driven primarily by the cash flow from an additional \$554 million in above-standard orders for Pentagon maintenance and RRMC upgrades.

WASHINGTON HEADQUARTERS SERVICES
Pentagon Reservation Maintenance Revolving Fund
Fiscal Year (FY) 2027 Budget Estimates
April 2026

Chart 1.

The cash management plan includes an upper and lower operational cash threshold for the entire fund. The PRMRF cash requirement is established using a process based on four primary elements: 1) disbursement rate; 2) operation range; 3) risk mitigation; and 4) cash reserves.

- **Rate of Disbursement:** Anticipated disbursements during the budget year were calculated by applying historical disbursement rates for the base year of FY 2024 plus five previous years, which typically disburse during the budgeted year (e.g., in FY 2026, PRMRF anticipates disbursing funds that were obligated in FY 2022 – FY 2026). The total of that anticipated annual disbursement amount is divided by the 12 monthly collection cycles to obtain an estimated monthly rate of disbursement.
- **Range of Operation:** The lower level of the operational range for cash for FY 2026 was determined by adding the amount needed to fund reserves with the amount needed for risk mitigation. The upper estimated limit of the operational range is the lower limit plus four months of anticipated disbursements. Starting in FY 2027 the range of operation is formulated using a standard deviation calculation of net outlays of 5 years' worth of collection and disbursement data based on an 80% confidence level.

WASHINGTON HEADQUARTERS SERVICES
Pentagon Reservation Maintenance Revolving Fund
Fiscal Year (FY) 2027 Budget Estimates
April 2026

- **Risk Mitigation:** The PRMRF's primary risk is delayed rent collections at the start of the fiscal year due to Continuing Resolutions, which disrupts cash flow as monthly disbursements for payroll and contracts remain consistent. While the FY 2026 budget incorporated this risk into its reserve calculation to handle "catch-up" rent collections, FY 2027 introduces a new methodology. Starting in FY 2027, risk mitigation is calculated using a standard deviation formula on net outlays, creating an additional funding buffer within the PRMRF's lower control limit.
- **Reserves:** A cash reserve is maintained to ensure sufficient funds are available for known obligations. It is specifically calculated to cover prior-year unliquidated obligations, unobligated balances carried into the budget year, and the unfunded leave liability. This reserve is capitalized through the collection of tenant rent.

Chart 2.

For fiscal years 2026 and 2027, Chart 2 shows the estimated cash balance for each month. The chart highlights two key things:

1. How incoming cash from operations will affect the budgeted cash balance.
2. Whether the final cash balance each month is within the target operating range.

The lower end of that range is determined by adding together risk mitigation and reserves. Before FY 2027, the upper end of the range was calculated by adding

WASHINGTON HEADQUARTERS SERVICES
Pentagon Reservation Maintenance Revolving Fund
Fiscal Year (FY) 2027 Budget Estimates
April 2026

the average disbursement rate to the lower limit.

For FY 2027, cash control limits are calculated using a statistical analysis of the fund's past spending. The upper control limit is now the sum of the lower limit and an operating range, which is determined by the standard deviation of the fund's largest historical outlays.

In FY 2027, the PRMRF is expected to significantly exceed its upper control limit.

- **Cause:** A one-time \$554 million funding increase for infrastructure projects.
- **Issue:** The limit calculation method, which is based on historical data, cannot adjust for such a large, anomalous funding increase.
- **Contingency:** Cash levels will likely return to normal if \$513 million of this funding is not approved via Reconciliation.

As mentioned previously, PRMRF cash balances typically dip early in the fiscal year due to delayed collections during Continuing Resolutions, but they recover in later months, allowing the fund to end the year within its control limits

Civilian Personnel

Civilian end-strength is the actual number of personnel onboard at the end of each fiscal year, while full-time equivalents represent the manpower needed to accomplish the annual workload. For the PRMRF, this personnel end-strength reflects actual execution in FY 2025 and authorized levels for FY 2026 and FY 2027, with the WHS planning to add another 14 civilians in FY 2027. These positions include facilities workers, law enforcement, security personnel, and general administrative support staff.

WASHINGTON HEADQUARTERS SERVICES
Building Maintenance Fund
Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

Table 3.

Overview

The Buildings Maintenance Fund (BMF) is a revolving fund that operates under the authority of Section 2208 of Title 10, United States Code (10 U.S.C. §2208). The BMF provides for the operation, maintenance, protection, and repair of 11 federally owned facilities, 56 non-delegated leased facilities, and 19 delegated leased facilities occupied by the Department of War (DoW) in the National Capital Region (NCR). The BMF provides space, building services and force protection for DoW components, including Military Departments and other activities located within the NCR. The BMF is managed by the Washington Headquarters Services (WHS) under authority delegated by the General Services Administration (GSA), the Department of Homeland Security (DHS), and finances select activities of WHS and the Pentagon Force Protection Agency (PFPA) within the NCR.

Utilizing the BMF GSA/DHS Rent Program, the WHS collects funds from all DoW tenants in leased facilities throughout the NCR to pay the monthly GSA rent and DHS security bills. DoW tenants pay a user charge for space and basic building services, and tenants who request above standard services pay an additional amount for those services. The program improves DoW oversight of tenant payment status and enables the Department to make timely and efficient payments to GSA and DHS.

The BMF Charter was updated in February 2023 to realign the management and funding of the Mass Transit Benefit Program (MTBP) to the BMF. The DoW MTBP provides mass transit benefits to all DoW organizations within the NCR. Realignment of the MTBP to the BMF significantly improves the efficiency of managing contracts that support the program.

The following table summarizes BMF actual and estimated obligations by activity group:

Budget Sub-Activity	Dollars in Millions				
	FY 2025	FY 2026	% Change	FY 2027	% Change
	Operating	Operating		Operating	
Real Property Operations	291.8	257.5	-13.3%	260.3	1.1%
Pentagon Force Protection Agency	36.4	37.8	3.8%	38.6	2.1%
Above Standard	84.5	102.6	17.7%	43.3	-136.9%
Total BMF Obligations	412.6	397.8	-3.7%	342.2	

Table 4.

Customer rates are set to recover operating costs budgeted for each year. The FY 2027 request reflects an increase in standard rates of 1.2% and a total

WASHINGTON HEADQUARTERS SERVICES
Building Maintenance Fund
Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

operating decrease of approximately -16.3% from FY 2026 rates. The large decrease in total obligation rates from FY 2026 is primarily attributable to decreases in expected unobligated balances carried forward and a reduction in planned spending to balance the AOR in FY 2027.

Budget Narrative

The operating budget includes annual inflationary adjustments for supplies, equipment, service contracts, and personnel. Roughly 80% of the BMF operating budget are GSA/DHS “pass through” funds. The BMF also provides for a safe and secure environment including, effective, proactive force protection and anti-terrorism programs for National Capital Region leased space personnel, assets and facilities. With return to office mandates going in to effect during FY 2025 the WHS is actively reevaluating space requirements for leased space tenants and planning for updated operating amounts with anticipated occupancy trends.

Changes in the PB 2027 operating budget, compared to FY 2026, reflect initiatives to stabilize rates and stay in line with inflation assumptions. However, as the Department pushes to lower its leased space portfolio some initiatives are being finalized, and agencies have now planned to begin turning in excess warehouse and administrative space. While this turning in of space has caused lower requirements for GSA/DHS pass through funds, the inclusion of updated inflation assumptions cause an overall slight increase in the operating requirements of the fund during this budget cycle.

In addition to the stabilized standard rates, above standard increases in the operating budget have been included in the budget for the Mass Transit Benefit Program that was moved to the fund at the end of FY 2023 and was initially reflected in the budget in FY 2024. With return to office mandates affecting all federal workers in FY 2025 more employees are utilizing the benefits than originally planned in prior budget cycles. The FY 2027 above standard operating budget for this program has been adjusted to account for the increased ridership numbers and benefit reimbursements.

Activity Group Composition

Real Property Operations (RPO):

RPO fund the safe and efficient operation and management of all DoW delegated buildings within the NCR. RPO include services such as cleaning, preventive maintenance, operation and repair of building mechanical and electrical systems, trash removal, landscaping, metered utilities in leased facilities, mass transit benefits, and administrative support. The scheduled maintenance and day-to-day customer support provide operational continuity for the customers' mission. The GSA/DHS Rent Program simplifies lease and security payments for BMF customers by combining GSA and DHS costs into one monthly rent bill. The program has significantly improved oversight and visibility of the transactions and costs associated with the BMF.

Pentagon Force Protection Agency (PFPA):

The PFPA is responsible for providing law enforcement; force protection; security; counterintelligence; antiterrorism; and chemical, biological, radiological, and nuclear protection to the people, facilities, infrastructure and other resources at the Pentagon Reservation, to the DoW activities within the National Capital Region (NCR), and to the Raven Rock Mountain Complex. The PFPA is the lead agency for coordination with DoW components, executive departments, agencies, and state and local authorities on matters involving force protection, security, and law enforcement for the Pentagon Reservation and DoW facilities within the NCR. BMF rents fund PFPA activities at leased facilities to include: 24/7 security assistance, law enforcement, handling of military working dogs, threat reduction, CBRN

Protection, COOP, Mission Assurance; Emergency Management, Special Events Support, Antiterrorism Force Protection, Physical Security, Counter mall-Unmanned-Aircraft-Systems, Secure Communications, Classified Waste Disposal, Counterintelligence Support, and High Risk Personnel Threat Management.

Cash Management

The operation of the fund consumes cash with disbursements and replenishes cash with collections from building tenants for rent orders. The FY 2027 cash plan includes all expected collections and disbursements from the operation of both the Real Property and Security activity groups based on a rolling average of actual historical monthly trends over the last four fiscal years. Chart 1 displays collections and disbursements from the BMF operations. The WHS forecasts slight a decrease to disbursements and a slight increase to collections in FY 2027 compared to FY 2026 as planned spending, primarily in above standard orders, is adjusted so that the fund achieves a zero AOR in the budget year.

Chart 1.

The cash management plan includes an upper and lower operational cash threshold for the entire fund. The BMF cash requirement is established using a process based on four primary elements: 1) disbursement rate; 2) operation range; 3) risk mitigation; and 4) cash reserves.

- Rate of Disbursement: Anticipated disbursements during the budget year were calculated by applying historical disbursement rates for the base year of

WASHINGTON HEADQUARTERS SERVICES
Building Maintenance Fund
Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

FY 2024 plus five previous years (i.e., for FY 2026, BMF anticipates disbursing funds that were obligated in FY 2022 – FY 2026). The total anticipated annual disbursement amount is divided by the 12 monthly collection cycles to obtain an estimated monthly rate of disbursement.

- **Range of Operation:** The lower level of the operational range for cash for FY 2026 is determined by adding the amount needed to fund reserves with the amount needed for risk mitigation. The upper estimated limit of the operational range is the lower limit plus four months of anticipated disbursements. Starting in FY 2027 the range of operation is now formulated using a standard deviation calculation of net outlays of 5 years' worth of collection and disbursement data for the fund based on an 80% confidence level.
- **Risk Mitigation:** The primary risk experienced by the BMF is typically related to delays in receiving orders at the start and end of the fiscal year. Normal start up delays for our customers to receive appropriations and issue funded orders have been exacerbated by the new normal of experiencing continuing resolutions every year. Other than the significant outlay to GSA and DHS, monthly disbursements are mostly for payroll and contract related costs. BMF passes through the GSA and DHS payments monthly, or as soon as collections are made, so this amount has historically not been included in the amount for risk mitigation. The amount set aside in the FY 2026 budget exhibits for risk mitigation is the monthly anticipated disbursements, net of the monthly amount passed through to GSA and DHS. Starting in FY 2027 however, risk mitigation is calculated using the annual standard deviation formula on the net outlays of the fund. This new methodology has resulted in an additional \$50M for risk mitigation to be incorporated into the BMF lower control.
- **Reserves:** Enough cash should be available to fund confirmed unpaid obligations, which are funded primarily through rent. Rent from prior years has already been collected and available to fund obligations, so a reserve is identified for unliquidated obligations. o ensure our disbursement forecast is accurate, we have adjusted our budget, where appropriate, for payments still awaiting official posting.

Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

Chart 2.

Chart 2 shows the projected monthly cash balances for FY 2026 and FY 2027. This chart displays how the cash from operations affect the BMF's 2026 Budget Estimates cash balance and where the projected ending balance for each month falls within the upper and lower operating ranges. The lower operational cash requirement is calculated by adding risk mitigation and reserves for the given fiscal year. Prior to FY 2027 The upper operating requirement is calculated by adding the average rate of disbursement to the lower operating requirement.

Starting in FY 2027, upper and lower cash control limits are calculated using statistical analysis of historical outlays of the fund. The upper control limit is the sum of the lower limit and the operating range.

Since the BMF is primarily pass through funds to DHS and GSA, there has not been a historical need to establish a larger risk mitigation reserves. Starting in FY 2027, the updated calculations for the control limit and risk mitigation amounts has significantly increased the lower control from FY 2026 to FY 2027. These limit changes have caused the projected cash amounts approach to the lower control limit in March, but the fund will ultimately have an end of year cash level that finishes within the controls.

April 2026

Civilian Personnel

Civilian end-strength represents the number of actual number of personnel employed at the end of each fiscal year. Full time equivalents represent the manpower level necessary to accomplish the projected workload on an annual basis. The personnel end strength reflects actual amounts in FY 2025 and authorized levels in FY 2026 and FY 2027. Personnel levels include facilities workers, law enforcement and security personnel, and general and administrative support positions within the fund. There are no changes in BMF civilian personnel.

Fiscal Year (FY) 2027 Budget Estimates
April 2026

Description of Operations

Executive Summary:

Table 1: Funding Overview

	FY 2025 (\$K)	FY 2026 (\$K)	FY 2027 (\$K)
Discretionary	7,629	5,700	5,700
Mandatory	-	2,000,000	18,000,000
Total	7,629	2,005,700	18,005,700

Table 2: Detailed Mandatory Breakout

BLI	Reconciliation Bin Title	FY 2025 (\$K)	FY 2026 (\$K)	FY 2027 (\$K)
DS1	Munitions and Supply Chain (20004)	-	2,000,000	-
DS1	Defense Industrial Base	-	-	18,000,000
Mandatory Total		-	2,000,000	18,000,000

Mandatory Funding Justification:

The FY 2027 request for National Defense Stockpile Transaction Fund (NDSTF) includes \$5.7 million of discretionary and \$18.0 billion of mandatory for a total of \$18.0 billion.

The mandatory funds are to acquire strategic materials critical to defense requirements to eliminate the remaining defense shortfalls currently identified within the National Defense Stockpile (NDS). The FY 2027 mandatory funds continue efforts from FY 2026 to further mitigate defense supply chain risks through acquisition of strategic and critical materials for addition to the NDS.

The FY 2026 spend plan amount for NDSTF includes \$5.7 million of discretionary and \$2.0 billion of mandatory (reconciliation) for a total of \$2.0 billion.

The FY 2025 spend plan amount for NDSTF includes \$7.6 million of discretionary and no mandatory (reconciliation) funding for a total of \$7.6 million.

DEFENSE LOGISTICS AGENCY
National Defense Stockpile Transaction Fund
Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

Description of Operations:

The Defense Logistics Agency Strategic Materials (DLA-SM) operates under the authority of the Strategic and Critical Materials Stockpiling Act (50 U.S.C. §98, et seq.). The Stockpiling Act provides for the acquisition and retention of certain strategic and critical materials in the National Defense Stockpile (NDS) to serve the interest of national defense. The Act also encourages the conservation and development of sources of such materials within the United States to mitigate dangerous and costly dependence upon foreign or single sources of supply in times of national emergency. DLA-SM identifies risks and develops mitigation strategies for the supply chain of defense and essential civilian industrial materials. DLA-SM activities include acquisition, storage, disposal, and management of the NDS.

DLA-SM will continue to mitigate risks by executing strategies such as research and development, acquisition of new materials to upgrade the NDS material inventory, qualification of domestic firms to expand supplier base, and recycling programs to recover critical materials.

Funding:

Historically, reimbursable funding through the sale of NDS materials deemed excess to requirements provided the source of funds for operations and new acquisitions of strategic and critical materials necessary to mitigate identified emerging supply chain risks. Proceeds from sales of excess materials are deposited to the NDS Transaction Fund (NDSTF), the revolving fund established to transact NDS business. The fund's cash corpus and salable assets have significantly diminished over the past decades. The remaining quantities of NDS materials excess to NDS needs are insufficient to fully finance the program.

In FYs 2022 through FY 2026, the program received appropriations to the NDSTF to fund requirements for strategic and critical material acquisitions and related stockpiling activities.

The Consolidated Appropriation Act, 2022 (P.L. 117-103), Title VII, Section 8035 provides \$125 million in direct funding for acquisitions with funds availability through FY 2024. DLA-SM completed execution in FY 2024.

The Consolidated Appropriation Act, 2023 (P.L. 117-328), Title VIII, Section 8034 provides \$93.5 million, and Section 8005 provides \$20 million in direct funding for acquisitions with funds availability through FY 2025. DLA-SM completed the \$113.5 million execution in FY 2024.

The Further Consolidated Appropriations Act, 2024 (P.L. 118-47), Title VIII, Section 8034 provides \$50 million in direct funding for acquisitions with funds availability through FY 2026. To date, \$39.5 million has been executed and remaining \$10.5 million is planned for execution within the second half of FY 2026.

The Full-Year Continuing Appropriations and Extensions Act, 2025 (P.L. 119-4), Section 1101 provides \$50 million in direct funding for acquisitions with funds availability through FY 2027. To date, \$29.7 million is executed and \$18 million is in commitment status. Section 1406 of the Act provides \$7.629 million in direct funding available until expended and has been fully executed.

DEFENSE LOGISTICS AGENCY
National Defense Stockpile Transaction Fund
Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

The One Big Beautiful Bill Act (P.L. 119-21), Section 20004, Paragraph 40 signed July 4, 2025, provides \$2 billion to improve the NDS with funds availability through FY 2029. Although the appropriation was received in FY 2025, the budget authority to execute was received in FY 2026. To date, \$174.7 million has been executed and \$573 million is in commitment status.

The Consolidated Appropriations Act, 2026 (P.L. 119-75) provides \$5.7 million in direct funding available until expended to the NDS program. To date, \$1.9 million has been executed.

Additionally, FY 2027 direct funding requests by DLA are \$18,005.7 million for continuation of high priority critical material stockpiling activities.

As critical and strategic materials supply chain risks emerge, DLA and the Department continue to monitor financial risks impacting mission capabilities.

DEFENSE LOGISTICS AGENCY
National Defense Stockpile Transaction Fund
Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

Sales Program:

Offerings of select strategic and critical material quantities deemed excess to current NDS requirement levels are currently projected to complete in FY 2026. Beginning in FY 2027 and thereafter, DLA plans no ongoing significant offerings of excess materials. Any quantities offered for sale may be minimal or for material upgrading or recharacterization purposes. When excess stocks are available, the Stockpiling Act provides for operation of a competitive sales program. Sales proceeds are deposited to the NDSTF revolving fund and remain as NDS Program resources until expended.

<u>(USD in Millions)</u>	FY 2025	FY 2026	FY 2027
Collections	<u>40.3</u>	<u>12.5</u>	<u>0.0</u>
Total	\$40.3	\$12.5	\$ 0.0

Strategic and Critical Material Acquisitions:

In FY 2022, DLA received direct funding of \$125 million with availability through FY 2024 and fully executed. In FY 2023, DLA received direct funding of \$113.5 million with availability through FY 2025 and fully executed. In FY 2024, DLA received direct funding of \$50 million with availability through FY 2026. DLA has executed \$39.5 million and is on schedule to complete execution as planned. In FY 2025, DLA received \$50 million with availability through FY 2027 and \$7.6 million with availability until expended. Execution is \$29.7 million and \$7.6 million respectively. Execution of the remaining authority is on schedule as planned. In FY 2026, DLA received direct funding authority for \$2,000 million with availability through FY 2029 and \$5.7 million with availability until expended. Execution is \$174.7 million and \$1.9 million respectively. Execution continues as planned. FY 2027 direct funding requests by DLA are \$18,005.7 million for additional high priority material acquisitions.

Use of reimbursable funding for acquisitions is expected to be minimal. The FY 2027 budget estimate is for no acquisitions compared to \$0.9 million budgeted for FY 2026.

Acquisitions of critical materials for stockpiling with limited supply sources may be delayed if international or domestic conditions further restrict availability.

Additional program strategies include reclamation of critical materials from surplus Federal assets and creating domestic sources of supply to help reduce or eliminate the need to stockpile certain materials.

DEFENSE LOGISTICS AGENCY
National Defense Stockpile Transaction Fund
Summary of Operations
Fiscal Year (FY) 2027 Budget Estimates
April 2026

Labor:

The FY 2027 labor budget increases \$2.1 million to \$13.7 million primarily for 10 additional FTEs. The growth from 65 FTEs in FY 2026 to 75 FTEs in FY2027 is needed for adequate staff to support the material acquisitions, material management, and increased storage operations as stockpile enhancement continues. DLA-SM will continue to identify and close emerging skill gaps, enabling the agency to carry out its mission. Resources requested ensure optimal staffing levels to achieve NDS program objectives. Staff performs managerial and operational duties, provides technical expertise, supports congressional and presidential directives to add material to the stockpile, engages in recycling, and pursues domestic qualification for strategic and critical materials.

Non-Labor:

Audit Sustainment Program: DLA received an unmodified clean opinion on the NDS Transaction Fund from the Independent Public Auditor for FY 2024 and FY 2025. DLA hopes to sustain the opinion. The FY2027 budget estimate decreases \$6.5 million from FY 2026 and aligns with recent requirement projections.

Mobilization Studies Program: The FY 2027 budget estimate increases \$0.3 million from FY 2026. Although material analysis and market studies sub-program increased by \$2.5 million, lower costs for risk mitigation study initiatives largely offset. The program supports ongoing and emerging materials analysis and materials market studies. The program comprises a broad range of research and analysis techniques that enable DLA-SM to gain a clear and comprehensive understanding of the requirements and vulnerabilities of U.S. defense and essential civilian industries. These research, analysis and development projects support reconstitution and expansion of stockpiling capabilities, through (1) laboratory-based scientific research and analysis, (2) expanded processes to model material supply chains downstream from mines to finished platforms, (3) development of effective risk mitigation strategies and (4) development of additional data collection and evaluation methods from industry and academia.

Material Handling and Testing Programs: The FY 2027 budget estimate increases \$4.5 million from FY 2026 to align with additional costs resulting from increasing material quantities being received into inventory. The programs support care and quality control of stockpile materials including fees for vendor managed storage and handling/testing requirements for stored materials, newly acquired materials, and material upgrades. Major program cost drivers are: (1) long term mercury repackaging/storage operations, (2) existing and newly acquired materials including strategic energetics reserves, (3) reclamation of select surplus materials from Federal Agencies suitable for the NDS and storage of semi-processed NDS materials at vendor locations to expedite finished processing in the event these materials are required in a contingency.

Rents and Leases: The FY 2027 budget estimate increases \$2.1 million from FY 2026 due to growth in square footage and some rate increases. Real property rental and leasing required to support stockpiling operations include warehouses, administrative buildings, service buildings and open land for outdoor storage obtained through occupancy agreements with the General Services Administration (GSA), other Federal Agencies, or commercial leases.

Depot Operations: The FY 2027 budget estimate increases \$2.6 million from FY 2026, primarily due to better certainty on program costs. Depot Operations are costs associated with operating and maintaining the day-to-day depot mission, including depot support for material audit, material handling and testing support, security systems, operations, maintenance, janitorial and landscaping services, fuel, and equipment.

Fiscal Year (FY) 2027 Budget Estimates
April 2026

Environmental: The FY 2027 budget estimate of \$1.5 million has no growth from FY 2026. Currently, plans for remediation work at Pt. Pleasant are on hold since the unmanned site is still an active storage location. The Somerville project is nearing completion and scope of soil remediation actions are smaller compared to previous years. The Somerville project is a multimillion-dollar, long term project to remediate soil and groundwater contamination at the site. Groundwater remediation, wetlands remediation and restoration, permits, inspections, and reports are ongoing. Costs include normal compliance requirements to sustain an environmental compliance program and environmental management system, perform compliance audits, and pay fees of approximately \$400-600 thousand per year. Other costs include annual renewal and maintenance of Radiation Safety Program, the NRC license at Scotia, NY, and implementation and maintenance of the integrated International Organization of Standards (ISO) at all three staffed depots – Scotia, Hammond, and Hawthorne. DLA-SM potentially may be required to complete additional environmental assessments or impact statements for future projects under consideration, dependent on specifics of the materials being acquired or recharacterized.

Other Programs: FY 2027 budget estimates also increase from FY 2026 for the following: Real Property Maintenance increases \$1.3 million for general road and facility repairs at depot locations receiving and storing materials, Travel increases \$1.1 million to support stockpile acquisition initiatives and additional requirements to handle quality assurance, contract compliance, vendor sites, and audits at storage locations and depots.

DLA and the Department continue to work to mitigate long-term financial risks impacting mission capabilities. These ongoing efforts seek to ensure a sustainable and robust stockpile of strategic and critical materials to protect the United States against supply chain disruptions during times of national emergency.

Introduction

The Defense Counterintelligence and Security Agency (DCSA) Personnel Vetting (PV) mission executes the functions of the investigative service provider (ISP) for most of the federal government, helping to ensure the trustworthiness and integrity of the military, federal and contract workforce government-wide by delivering national security and suitability personnel security products and services. The DCSA offers its federal customers a variety of investigative products and services to meet specific personnel security customer demands. The DCSA accomplishes end-to-end background investigation (BI) case processing, which includes record reviews, fieldwork, and quality assurance. Under the PV mission, DCSA combines BI with continuous vetting (CV), other screening services, personnel security adjudication services, customer/stakeholder engagements, internal policy and procedural guidance, and ongoing key performance analyses, to provide full personnel vetting services for its 100-plus federal agency customers. These PV mission activities are underpinned by support services provided by other DCSA offices, other Department of War (DoW) activities, and the Office of Personnel Management (OPM).

On October 1, 2019, the DoW, pursuant to section 2208 of Title 10, United States Code, established the DCSA Working Capital Fund (WCF) to finance the PV BI mission. With an updated DCSA WCF Charter in August 2024, the WCF now finances the end-to-end PV mission, including BI, CV, and adjudications (ADJ).

Fieldwork for BI is accomplished by a DCSA workforce composed of both federal and contract investigators. The investigations are supported by a team that requests, processes, conducts, analyzes, and reports the results of over 25 million annual investigative record reviews from federal, state, local, and vendor data repositories that encompass individual background investigations. Investigative products are reviewed by a quality assurance team to ensure conformance with Federal Investigative Standards (FIS) in compliance with appropriate laws, regulations, executive orders, adjudicative guidelines, and policies. Each product is evaluated to determine its sufficiency for delivery to DCSA customers for adjudication, reopened for missing items or scheduled for additional investigative work as necessary, or sent to the Counterintelligence Directorate for evaluation and potential referral to outside criminal and intelligence agencies for further action. In FY 2025, the DCSA PV mission executed and delivered over 2.75 million investigative products for its customers as well as provided CV services for over 3.7 million federal, military, and contract workforce employees. Since its standup in FY 2020, DCSA has delivered timely, high-quality products and services to its customers.

The DCSA PV mission works with over 140 federal department and agency customers, cleared industry partners, state, local, and tribal law enforcement agencies, regularly ensuring products and services meet customer requirements and the current threat environment. In addition, the DCSA PV mission has a dedicated team working to improve the accessibility and cost of criminal history record information that resides in state, local, and tribal repositories. In support of the DCSA PV mission end-to-end ISP role, a team performs regular mission coordination, operational policy and procedural guidance, and the collection and analysis of performance metrics. This work aligns with the national policy objectives of the FIS, the Trusted Workforce (TW) 2.0 Implementation Strategy, continued accountability internally and externally to meet mission goals, regular efforts to increase the effectiveness and efficiency of PV products, and improved coordination across the DCSA PV mission.

The DCSA continues to offer Expedited Screening Protocol (ESP) services to both DoW and non-DoW agencies via the DCSA WCF. In response to Public Law 115-91, DCSA developed ESP to provide a centralized standard process for the screening and vetting of covered individuals with foreign risk who require access to government systems, facilities, personnel, or information, including access to classified information. The ESP services optimize intelligence data sources, other classified and unclassified U.S. Government data systems, and human analytics to provide multi-point identity detection of potential

foreign risks to support improved actions in the BI.

Starting in FY 2024, DCSA completed the full transition of its CV services to a fee-for-service model by beginning to provide its DoW CV services through the DCSA WCF. In FY 2025, in coordination with the DoW customers and other stakeholders, DCSA converted the DoW consolidated adjudications services (CAS) from a DoW appropriation funded program to a fee-for-service program in the DCSA WCF, administered by the newly formed Adjudication and Vetting Services (AVS) division within PV, now known as Trust Decision (TD). The resulting products and services are offered to DoW customers bundled with DCSA's existing BI and CV products creating a single funding model that will lead to anticipated financial and process efficiencies. This conversion also provided DCSA and its customers with a more efficient financial agreement process as DCSA consolidated all PV mission services under the minimum possible number of customer financial agreements. Moreover, the conversion of CAS to the DCSA WCF enhanced the customers' ability to track and validate costs of end-to-end DCSA PV mission services, leading to improved customer experience.

DCSA continues to prepare for the future delivery of new PV services via the DCSA WCF in support of the TW policy. At the start of FY 2025, DCSA began onboarding the federal government's Non-Sensitive Public Trust (NSPT) population into an initial CV service. The NSPT comprises individuals who hold non-national security roles but could pose a higher risk due to access to government information and installations. Through and beyond FY 2028, DCSA will enhance its current CV services with the goal of implementing additional data sources and time-based checks to further enhance the ability to maintain a trusted Federal workforce. The DCSA will also continue to build the 3-tier TW BI model that simplifies the existing 5-tier FIS model into a high, moderate, and low-tier structure. The DCSA's FY 2027 product and service catalogue and pricing document includes an "Early Adopter" segment providing preliminary pricing for products and services aligned with the TW 2.0 implementation strategy. This catalogue is provided to customers as a Federal Investigative Notice (FIN) for FY 2027.

In summary, DCSA's PB submission for FY 2027 accounts for the progressive implementation of TW 2.0 via the DCSA WCF. The TW 2.0 is a government-wide initiative to reform personnel vetting (BI, CV, and ADJ) in support of establishing and maintaining a trusted Federal workforce. The TW 2.0 reforms seek to streamline policy and tailor personnel vetting activity to an individual's circumstances. These features allow for better risk management, rapid onboarding of trusted individuals, increased workforce mobility, and greater awareness of potential security concerns. Application of CV allows DCSA to support mitigation of potential personnel security situations before they become larger problems, either by working with the cleared individual and/or the individual's agency to mitigate potential issues, or in some cases suspending or revoking clearances. In support of the TW 2.0 vision, DCSA will deliver CV services to both the national security, NSPT, and low-risk federal-wide populations. In accordance with the conversion of CAS to a fee-for-service model for its DoW customers, DCSA will also offer CV alert and incident report adjudication as an add-on to CV products, as well as full customer service request service.

Budget and Pricing Information

Starting in FY 2025, DCSA began executing the entire PV mission via the DCSA WCF, a fee-for-service model that efficiently provides personnel security products and services using a full cost recovery business-like model with the overall goal of financially breaking even over time. With the implementation of the 3-tier TW products, scheduled for introduction in the future, DCSA will integrate costs for Triggered Enhanced Subject Interviews, International Coverage, and ESP into the Moderate Tier price with other triggered costs added to the High Tier price. The DCSA made this decision to integrate triggered costs into base BI prices in response to customer requests for a more budget-development friendly DCSA price structure.

Defense Counterintelligence Security Agency
Revolving Funds
Narrative
Fiscal Year (FY) 2027 Budget Estimates
April 2026

DCSA's major focus in FY 2026 and FY 2027 is transitioning from reducing its cash reserve through below-cost pricing to full-cost recovery pricing and to execute this change in a way most manageable for customers. In the coming years, DCSA intends to reduce costs through a combination of reduced federal staffing requirements (fewer FTE to operate the mission) and process efficiencies.

FY2026: Through a combination of budget efficiencies and DCSA's rate increases in FY 2026, DCSA anticipates operating closer to full cost recovery throughout FY 2026. The DCSA's previously approved rates for FY 2026 reflect an increase of 10 percent for BI products and services and a conservative 3 percent increase in CV products and services to cover inflationary cost growth associated with CV service delivery. Following the federal government shutdown in FY 2026 (October-November), DCSA has adjusted its forecasted new orders and budget represented in this PB submission. Specifically, DCSA expects there to be fewer total orders from customers this year as the shutdown suspended personnel security processes for non-critical agencies. While DCSA continues to expect strong demand from its DoW customers for the remainder of the year, overall reduced demand and slightly reduced variable costs associated with the demand are reflected in this submission.

FY2027: The DCSA continues to operate towards no further rate increases in FY 2027 as additional budget controls enable the agency to operate efficiently and continue to deliver timely products and services. The DCSA's budget in FY 2027 is largely driven by the continued emphasis on identified operational efficiencies. Through further FTE reductions and non-labor process efficiencies, DCSA anticipates continued budget restraint will enable delivery of improved products and services in the future without significantly impacting the overall customer cost of personnel security. New orders in FY 2027 (in aggregate) are expected to be largely comparable to FY 2026 and reflect expected reductions in DoW industry (contractor) demand. The DCSA operates the Personnel Security Management of Industry (PSMOI) mission and its associated Personnel Security Investigations Industry (PSI-I) budget via its appropriated operation and maintenance fund. The DCSA's WCF exhibits account for the planned reductions to this appropriated line, slightly impacting total WCF orders in FY 2027.

DCSA WCF Cash Management Plan

The DCSA uses data-driven analytics to manage its WCF cash based on its current and future specific mission requirements. These requirements are in large part driven by federally mandated PV policies and standards and the evolving TW 2.0 policy requirements. As part of a robust cash management plan and in alignment with its September 2023-published cash management policy, DCSA executed its annual requirements. The chart below displays the DCSA WCF cash re-evaluation of its operating range and its upper and lower cash threshold plan through FY 2027. The DCSA cash requirement and operating range are developed using a provided statistically based methodology, which accounts for historical fluctuations in cash balance. In FY 2027, the lower requirement is \$323 million, and the upper requirement is \$1,002 million. Future cash planning activities will continue to leverage the provided methodology for consistency and standardization over time.

As DCSA enters its seventh year of operation, it also continues to better understand its operating risk requirements while the national PV mission undergoes significant transformation (e.g., the federally mandated TW 2.0). The DCSA will retain \$50 million to manage the continued uncertainties of TW 2.0 implementation and expansion of CV to the NSPT and low-risk populations. The DCSA anticipates fluctuations in customer demand due to budget constraints and the incremental implementation of the new TW policy reforms, resulting in a possible reduction in orders leading to reductions in planned revenue.

DCSA expects the cash balance to fall within the operating range by the end of FY 2026 and remain within the (newly prescribed) range in FY 2027.

Appendices: Cash Plan, Key Metric Tables/Visualizations

DCSA WCF Cash Plan

In FY 2027, consistent with DCSA’s cash management policy, DCSA will continuously evaluate its operating range requirements to include the minimum operating threshold, to assess its requirements for future years. The DCSA continues to refine the appropriate costs for functional support elements (e.g., Human Resources, Acquisitions, Logistics, Financial Management), particularly considering the broadening of its DCSA WCF operation into a more comprehensive PV mission.
